

Tom Beaumont | Product Designer

Product Designer with 4+ years' experience delivering digital and hardware-integrated products across consultancy and in-house roles. Skilled at uncovering user needs, defining problems worth solving, and translating complex requirements into high-fidelity designs within Agile environments. Proven track record in regulated, high-stakes contexts, balancing technical constraints with user-centred strategy to drive commercial outcomes.

Experience

Bright Tangerine | Product Designer

DEC 2024 - PRESENT

- Product Discovery:** Worked directly with professional users to identify pain points in their workflows, then scoped and proposed product solutions, translating observed needs into defined problems worth solving.
- Systems Thinking & IA:** Led UX and UI thinking across product ranges, translating complex technical requirements into structured, intuitive systems for specialist end users.
- Design System Management:** Designed and maintained consistent visual and interaction standards across 100+ SKUs, reinforcing brand coherence and information hierarchy.
- Workflow Automation:** Designed and coded an internal Python tool reducing packaging decision time by 93%, saving 50+ hours annually across 84 SKUs.

Innovate Design | Junior Product Designer

NOV 2023 - DEC 2024

- Agile Delivery:** Led UI/UX execution across 30+ client projects in a fast-paced consultancy environment, translating ambiguous briefs into market-ready solutions.
- Stakeholder Collaboration:** Facilitated design sprints and workshops to align client ambitions with user needs and technical realities.

3form Design | Product Designer (Placement)

JUL 2021 - AUG 2022

- MedTech UI Leadership:** Owned UI/UX design for Quadsense, a surgical guidance system used by orthopaedic surgeons during live total knee replacement procedures, conducting observational research and iterative testing to translate clinical workflows and sterile-field constraints into a usable interface.
- Regulated Delivery:** Worked across the full design lifecycle within ISO 13485 and medical device regulatory constraints, balancing usability requirements with safety-critical engineering needs.
- Commercial Impact:** Shipped a product deployed across 300+ procedures in the UK, US, and NZ, contributing to £3.8M in funding and regulatory approval.

Education & Awards

BSc Product Design 1st Class Honours

Nottingham Trent University, 2023

Cambridge Consultants Award

For outstanding user empathy and design quality across the cohort.

Core Skills

Design

Prototyping, Wireframing, Web Design, UI Design, Design Systems, Responsive Design, Information Architecture, Accessibility (WCAG)

Research & Strategy

User Research, Discovery, Problem Framing, Usability Testing, User Journey Mapping, Personas, Workflow Mapping, Design Thinking, Service Design

Collaboration & Delivery

Agile, Stakeholder Workshops, Cross-functional Collaboration, Design Sprints

Tools

Figma, XD, Adobe Creative Cloud, Miro, WordPress, Python
